Pradeepkumar R

Associate Solution Designer | SME | Innovative Problem Solver
WP. Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Summary

As an experienced Associate Solution Designer and SME, I bring
a wealth of knowledge in full stack development and innovative
problem-solving. With hands-on experience in creating dynamic
web applications using React, I have extensively worked on Single
Page Applications (SPAs) utilizing React, Redux, Next.js, Node.js,
Keycloak, and more. My expertise includes continuous integration
and deployment (CI/CD) with GitHub and Azure DevOps.

With a strong background in information technology and a Bachelor
of Engineering (B.E.) in Computer Science Engineering from C.
Abdul Hakeem College of Engineering and Technology, I am
committed to leveraging my skills to drive innovation and deliver
impactful solutions.

Experience

MindGraph
3 years

Associate Solution Designer
July 2024 - Present (2 months)
WP. Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Roles and Responsibilities:

1. Providing solutions to the various problem statment

2. Technical solutioning various system and technology

3. Actively working with the sales team on new project proposals

4. Designing and Implementing Application Architecture

5. Designing and Implementing Cloud Infrastructure with High Availability and
Disaster Recovery

6. Bringing in new technologies which will reduce the development effort

7. Design and Implement IDP (Identity Providers) flow such as Keycloak,
Active Directory

8. Ensuring the cloud security and application security by implementing various Cyber Security Techniques and Cloud Services from Azure

9. Interacting with client and solving the technical items for the project and infrastructure

10. Reviewing the cloud implementation and security implementation of the project

11. Guiding the organization for better application quality delivery

12. Implemeting various techniques to reduce the errors and improves quality of code leveraging tools like sonarqube

Senior Software Engineer
September 2021 - July 2024 (2 years 11 months)
Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Roles and Responsibilities:

1. Developing Error Free React Modules

2. Developing Modular components for better reusability

3. Collaborate with various stakeholders and design a technical solution for Products & Features

4. Reviewing peer developers and Junior developer codes and PR

5. Mentoring Juniors and Interns for better career and company growth

6. Implemented and Goverenenced Code Guidelines, Branching Strategies and Project Management Tools

7. Lead a Product team includes Backend, Frontend and Devops

8. Implemented and Guided DevOps team on CICD Pipelines Leveragint Azure Devops, Jenkins

9. Setting up the Cloud Infrastruture leveraging Microsoft Azure

10. Optimizing the cost by actively optimizing the resources

11. Guiding the DevOps team on the cloud infrastructure

Virtusa
Consultant - Technology
April 2020 - July 2021 (1 year 4 months)
Chennai, Tamil Nadu

Roles and Responsibilities:

1. Developing Error Free React Modules

2. Developing Modular components for better reusability

3. Defining Types and Interface to ensure 'Zero' Error on code-blocks

4. Code using shorthand methods with ES6+ Functions

5. Effectively maintaining state using Hooks and React-Redux

6. Creating Custom Hooks for various Components

7. Effectively handling API Data with promises, async and with AXIOS client

8. Implementing Lodash functions to speedup the process and to improve quality of code

9. Writing Test cases for functional components to ensure the code quality,

10. Optimising components and test case for better code coverage

Capsule8
Web Developer
August 2019 - April 2020 (9 months)
Chennai, Tamil Nadu

Roles and Responsibilities:

Console Development:

1. Developing Error Free React Modules

2. Developing Modular components for better reusability

3. Defining Types and Interface to ensure 'Zero' Error on code-blocks

4. Code using shorthand methods with ES6 Functions

5. Effectively maintaining state using Hooks and React-Redux

6. Creating Custom Hooks for various Components

7. Effectively handling API Data with promises, async and with AXIOS client

8. Implementing Lodash functions to speedup the process and to improve quality of code

9. Writing Test cases for functional components to ensure the code quality,

10. Optimising components and test case for better code coverage

Kibana Plugin Development:

1. Creating Modular React Components to support various version of Kibana to Ensure Zero code changes

2. Creating Hashed Routes to support Kibana Plugin

3. Maintaining States with Hooks and React-Redux

4. Developing CURD API for Alert Data

5. Developing single click function to import Kibana Dashboard

BlueAlly
1 year 9 months

UI/UX Designer
May 2018 - July 2019 (1 year 3 months)

Giving a best user experience makes the product more valuable. Being UI/UX Designer am having responsibilities to deliver more usable user flows, attractive & user friendly designs, product prototyping and etc...
